

INVESTING IN CLEAN WATER

Naomi's Village is a Kenyan children's home, preschool, and K-12 academy serving 464 children and employing 200 staff in the Great Rift Valley.

As the water crisis in this region of Kenya has continued, children are being disproportionately affected. The scarcity of safe water forces many Kenyans to drink from, wash in, and clean with contaminated water, thus introducing diseases into households and communities.

This lack of clean water leading to poor sanitation and insufficient hygiene ends up causing a high number of preventable deaths, especially among vulnerable babies and small children

Access to safe, clean water is more important now than ever.

Our location in a semi-arid region of the Great Rift Valley makes access to the water necessary for the provision of these essential amenities a challenge. That is why we are raising \$29,885 to construct a new water system that will supply enough water for both current and future needs.

We're asking you to partner with us, to provide care and education for at-risk children by donating to help Naomi's Village build a water system capable of providing safe, clean water to the children we serve.

By helping us to fund this project, you will be impacting the lives of children in the Rift Valley area of Kenya for generations to come.
